

Data:

- dc3-mrgWAS-dc8\_merge\_20120518\_R7\_thru20120622.ict
- Fit lines are derived from orthogonal distance regressions.
- $R^2$  values are calculated independently, not from orthogonal distance regression.
- Avg Bias denotes the difference between  $y$  and  $x$ , calculated by  $(y-x)$ .
- Outliers removed from average statistics (PTR-MS > 900 & WAS < 200)
